We have followed the hospital industry and its consumers closely for more than 20 years. Our rankings have identified the Best Hospitals for the most seriously ill patients in specialties ranging from cancer to neurology to heart disease. Next year we will be broadening our coverage to identify top providers of more routine care, such as hip replacement and heart bypass surgery. We’re also expanding our mission: This first annual forum will examine the most pressing challenges facing the hospital industry and try to surface optimal answers from the nation’s most distinguished healthcare experts and thought leaders.
